Software Engineer | Full-Stack · Backend · AI/ML Integration

PROFESSIONAL SUMMARY

Computer Engineering graduate (June 2026) with hands-on experience across the full development stack — backend REST APIs (Java, Spring Boot), frontend UIs (React.js), databases (SQL, MySQL), and AI/ML integration (LangChain, RAG, Gemini API). Built and shipped 4 end-to-end production-style projects. Zensar Technologies internship. Winner, Converges2025 National Innovation Challenge (500+ teams). Oracle Certified Generative AI Professional. 350+ DSA problems solved on LeetCode.

EDUCATION

R.C. Patel Institute of Technology, Shirpur

2022 – 2026

B.Tech in Computer Engineering | CGPA: 8.1 / 10

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Backend: Spring Boot, REST API Design, Core Java, SQL Queries, Stored Procedures, MySQL, H2 Database

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Component-based UI Development

AI / ML: LangChain, RAG Pipelines, FAISS Vector Store, Gemini API, Prompt Engineering, LLM Integration, AI Agents

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Postman, n8n Workflow Automation, VS Code, IntelliJ IDEA

EXPERIENCE

Software Engineering Trainee | Zensar Technologies

Dec 2024 – Jan 2025

- Optimized SQL stored procedures and triggers on production database modules, improving query execution performance and data reliability.
- Developed Core Java REST APIs following clean architecture principles, increasing code reusability and backend scalability across multiple service layers.
- Contributed to full-stack integration between React.js frontend and Spring Boot backend, ensuring low-latency, consistent data flow.

PROJECTS

AI-Powered E-Waste Management Platform [GitHub ↗](#)

2025

React.js | Spring Boot | REST API | H2 Database | Gemini API | n8n | Postman

- Designed and built a full-stack web application — React.js frontend, Spring Boot REST API backend, H2 relational database — covering end-to-end e-waste disposal request management and logistics tracking.
- Integrated Gemini API for AI-based waste classification and auto-generated environmental impact reports per pickup, replacing manual assessment.
- Automated scheduling via n8n event-driven workflows; validated all REST endpoints with Postman ensuring API contract compliance.

Multi-PDF Question Answering Bot [GitHub ↗](#)

2024

Python | LangChain | FAISS Vector Store | RAG | LLM Integration

- Architected a production-grade Retrieval-Augmented Generation (RAG) pipeline using LangChain, enabling context-aware natural language querying across multiple PDF documents simultaneously.
- Fine-tuned document chunking strategy and FAISS embedding parameters, reducing irrelevant retrieval by ~40% and improving LLM answer accuracy and context-window efficiency.

AI Resume Screener & Job Matcher Agent [GitHub ↗](#)

2025

Python | Gemini 1.5 API | Prompt Engineering | n8n | Google Sheets API

- Built an end-to-end LLM-powered recruitment pipeline: parses resume PDFs, extracts structured candidate data (skills, experience, education), computes job-fit scores, and ranks 50+ candidates.
- Automated full candidate lifecycle — evaluation → scoring → Google Sheets logging → personalized email notification — via n8n, cutting manual screening time from ~20 min to under 2 min per batch.

Autonomous AI Placement Preparation System [GitHub ↗](#)

2025

React.js | n8n | Gemini API | Google Sheets API | Multi-Agent AI Workflows

- Built a full-stack placement prep platform — React.js frontend, n8n as visual backend automation engine, Google Sheets as structured persistent data store — eliminating the need for a traditional server.
- Designed multi-agent AI workflows in n8n powered by Gemini API for resume parsing, skill-gap scoring against JDs, interview Q&A generation, and personalized learning roadmap creation.

ACHIEVEMENTS & CERTIFICATIONS

- Winner – Converges2025 National Innovation Challenge by Data Polaris (Unstop) — AI-driven solution selected among 500+ competing teams pan-India.
- Oracle Certified Generative AI Professional (2025) — LLMs, prompt engineering, vector databases, production-grade GenAI application design.
- 3-Star CodeChef Rating | 350+ LeetCode Problems Solved — DP, graphs, trees, binary search, sliding window.
